

Introduction

GOTO NIGHT

WHO AM I?

- Aalborg University (in Aalborg)
- Work at Trifork A/S

WHAT IS UNITY?

INTRODUCTION

- Unity is a tool for making 3D applications
- “Author once, deploy everywhere”

HISTORY AND FACTS

- Danish company
- HQ in San Francisco
- Unity 1.0 at WWDC 2005
- Unity 4.3 in 2013
- 225M Plugin installs
- 2 mil registered developers

UNITY GALLERY: GAMES

UNITY GALLERY: APPS

INSIDE THE PACKAGE

- Unity can be divided into three parts
 - Engine packed with expensive tech
 - Intuitive and powerful editor
 - Multiplatform development

ENGINE

- Rendering
- Lighting
- Networking
- Terrains
- Physics
- Particles
- Audio
- Programming
- Many more..

RENDERING

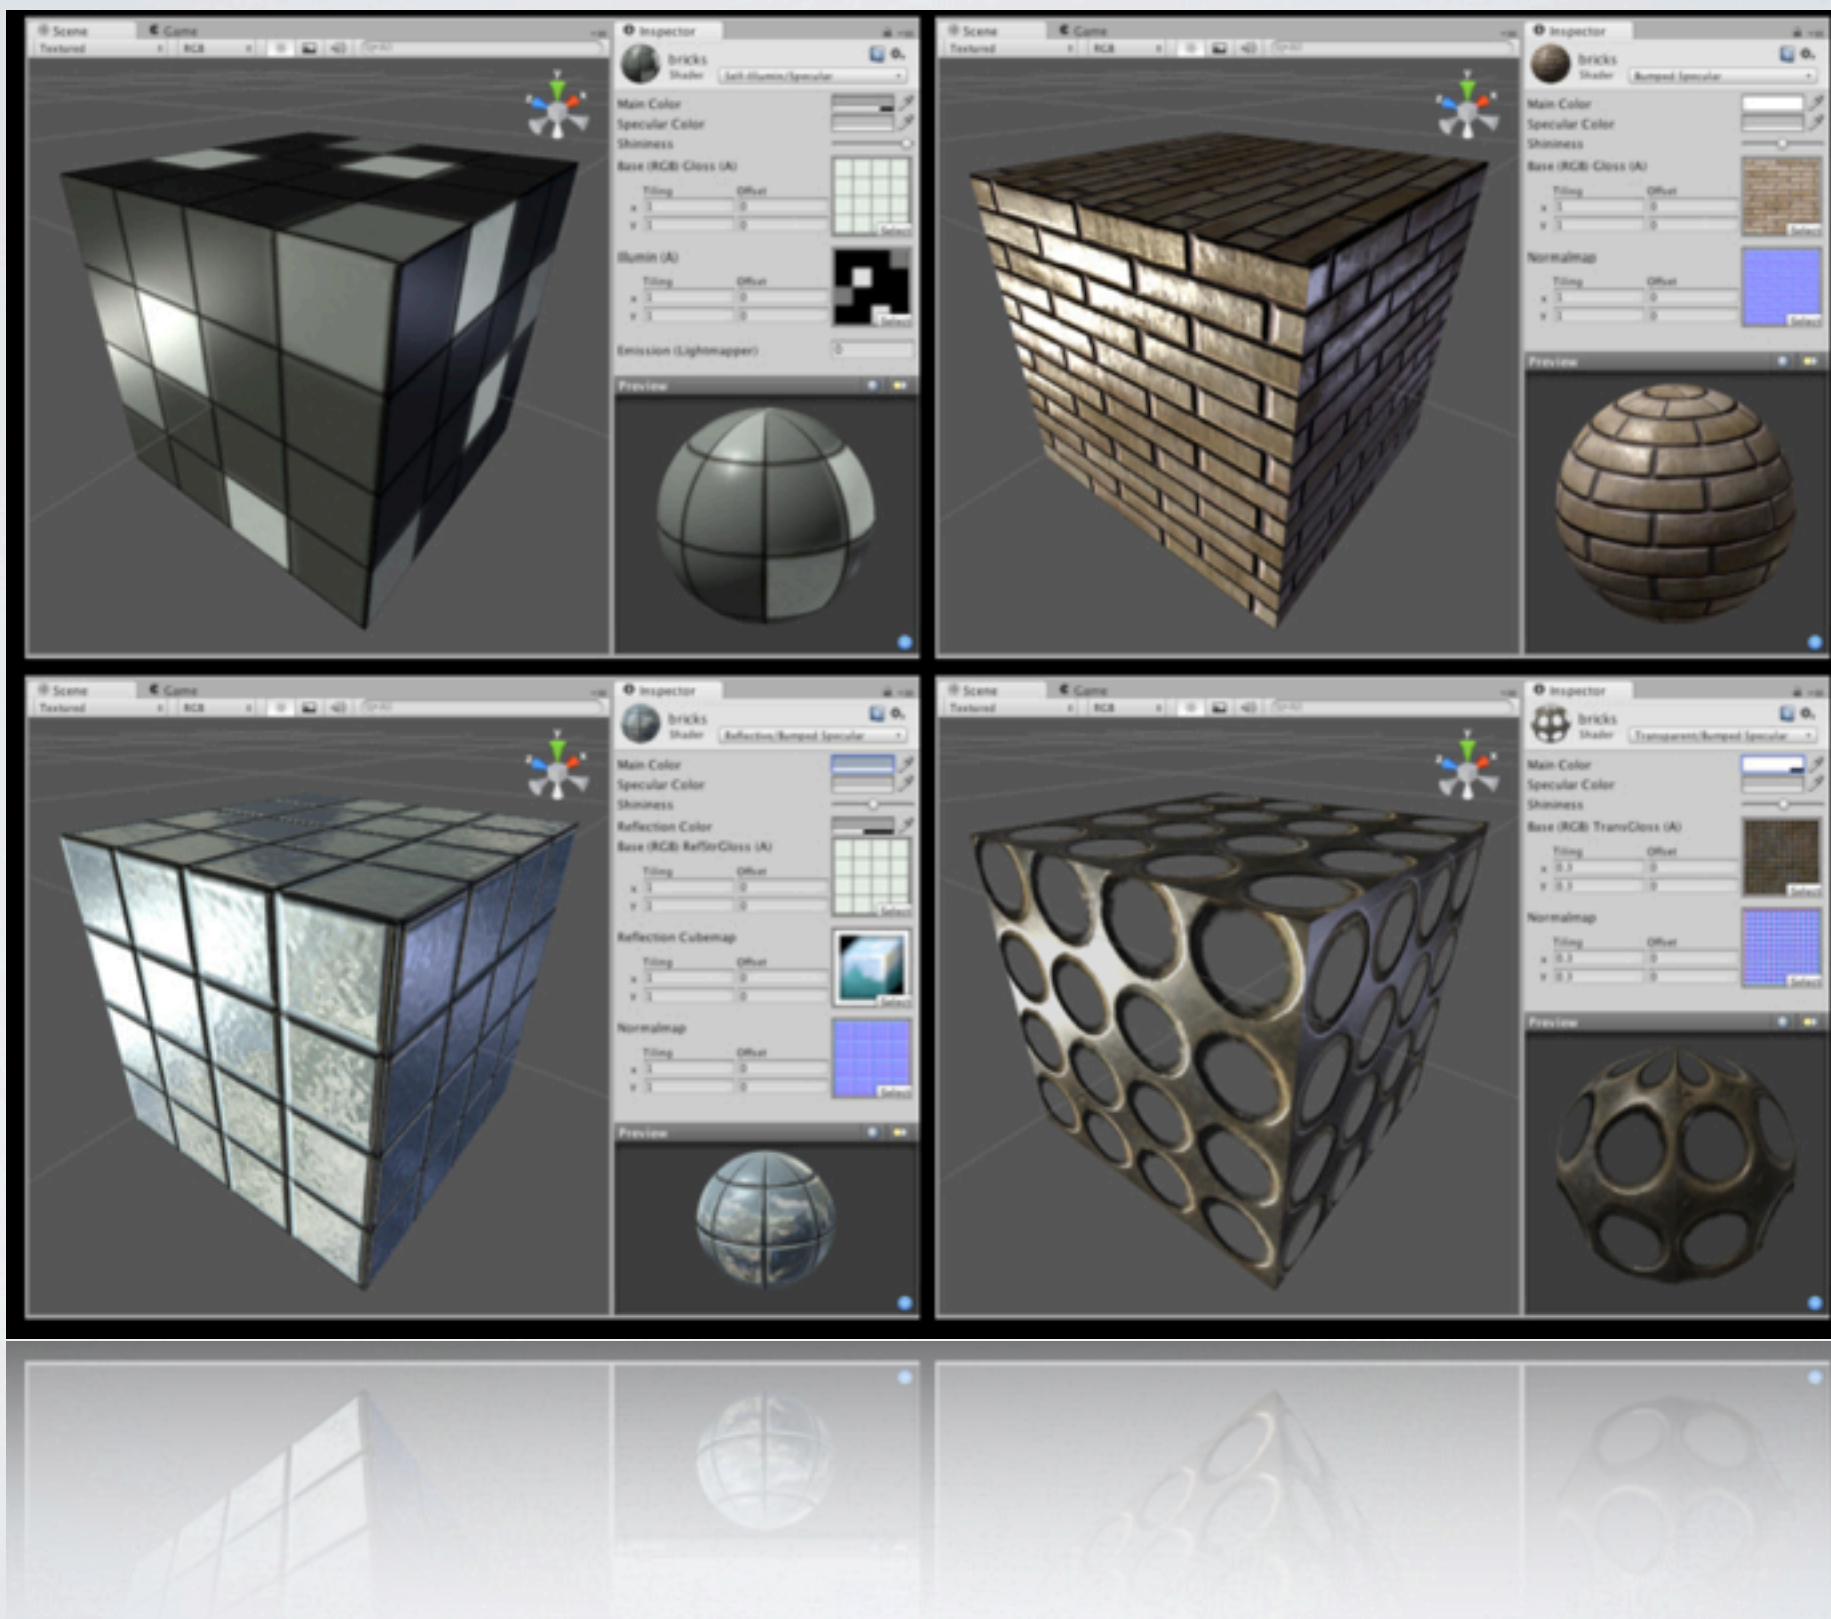

- Generating the graphics
- DirectX and OpenGL
- Surface Shaders
- Scalable for different platforms
- Occlusion Culling and LOD

SURFACE SHADERS

- A lot of Shaders both built-in and on Asset Store
- Do your own shaders
- Mobile shaders

TERRAINS

PHYSICS

- Nvidia PhysX
- Rigidbodies
 - Physics Materials
 - Triggers
- Colliders and collisions
 - Box, Mesh, Sphere, RayCasting, Wheel colliders...

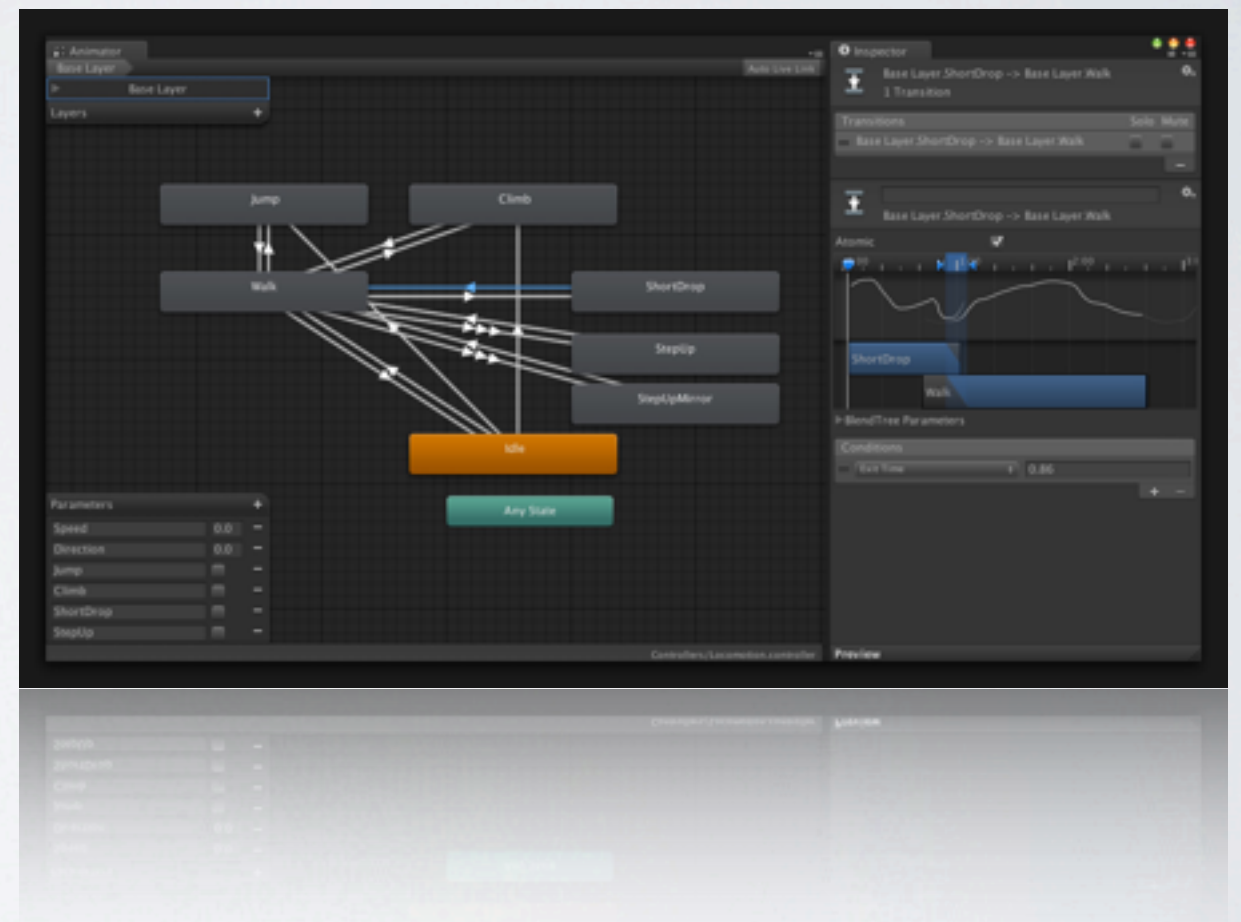

PHYSICS

- Joints
- Softbodies
- Cloth Simulation

ANIMATION

- Animation Editor
- Animation Clips
- Bones, IK
- Animation & Pose blending

OPTIMIZATION

- Mobile hardware
- Fill rate
- RAM
- Drawcalls!!

dungeon legend

Unity 3.0 - Beast Light Mapper

14-16 Drawcalls

5k Polygons

Lightmapping — Beast (after)

FULLSCREEN POSTPROCESSING FILTERS

- Most interesting filters
 - Bloom + Lens Flare, DOF, Sun Shafts, Color Correction,
 - Glow, SSAO, Motion Blur, Noise, Twirl, Vortex
- Hardware consumption
- Not supported on mobile devices

ARTIFICIAL INTELLIGENCE

- Built in Pathfinding
- Many more tools on the Asset Store
 - Behaviour Trees
 - Sensoring
 - etc.

EDITOR

- Integrated Editor
- Build your scenes
- The asset pipeline
- Asset Store
- Asset Server

INTEGRATED EDITOR

- Mac and Windows
- Live preview of your game
 - Graphic emulation
 - iPhone / Android remote
- Customize your editor
- Use prefabs!

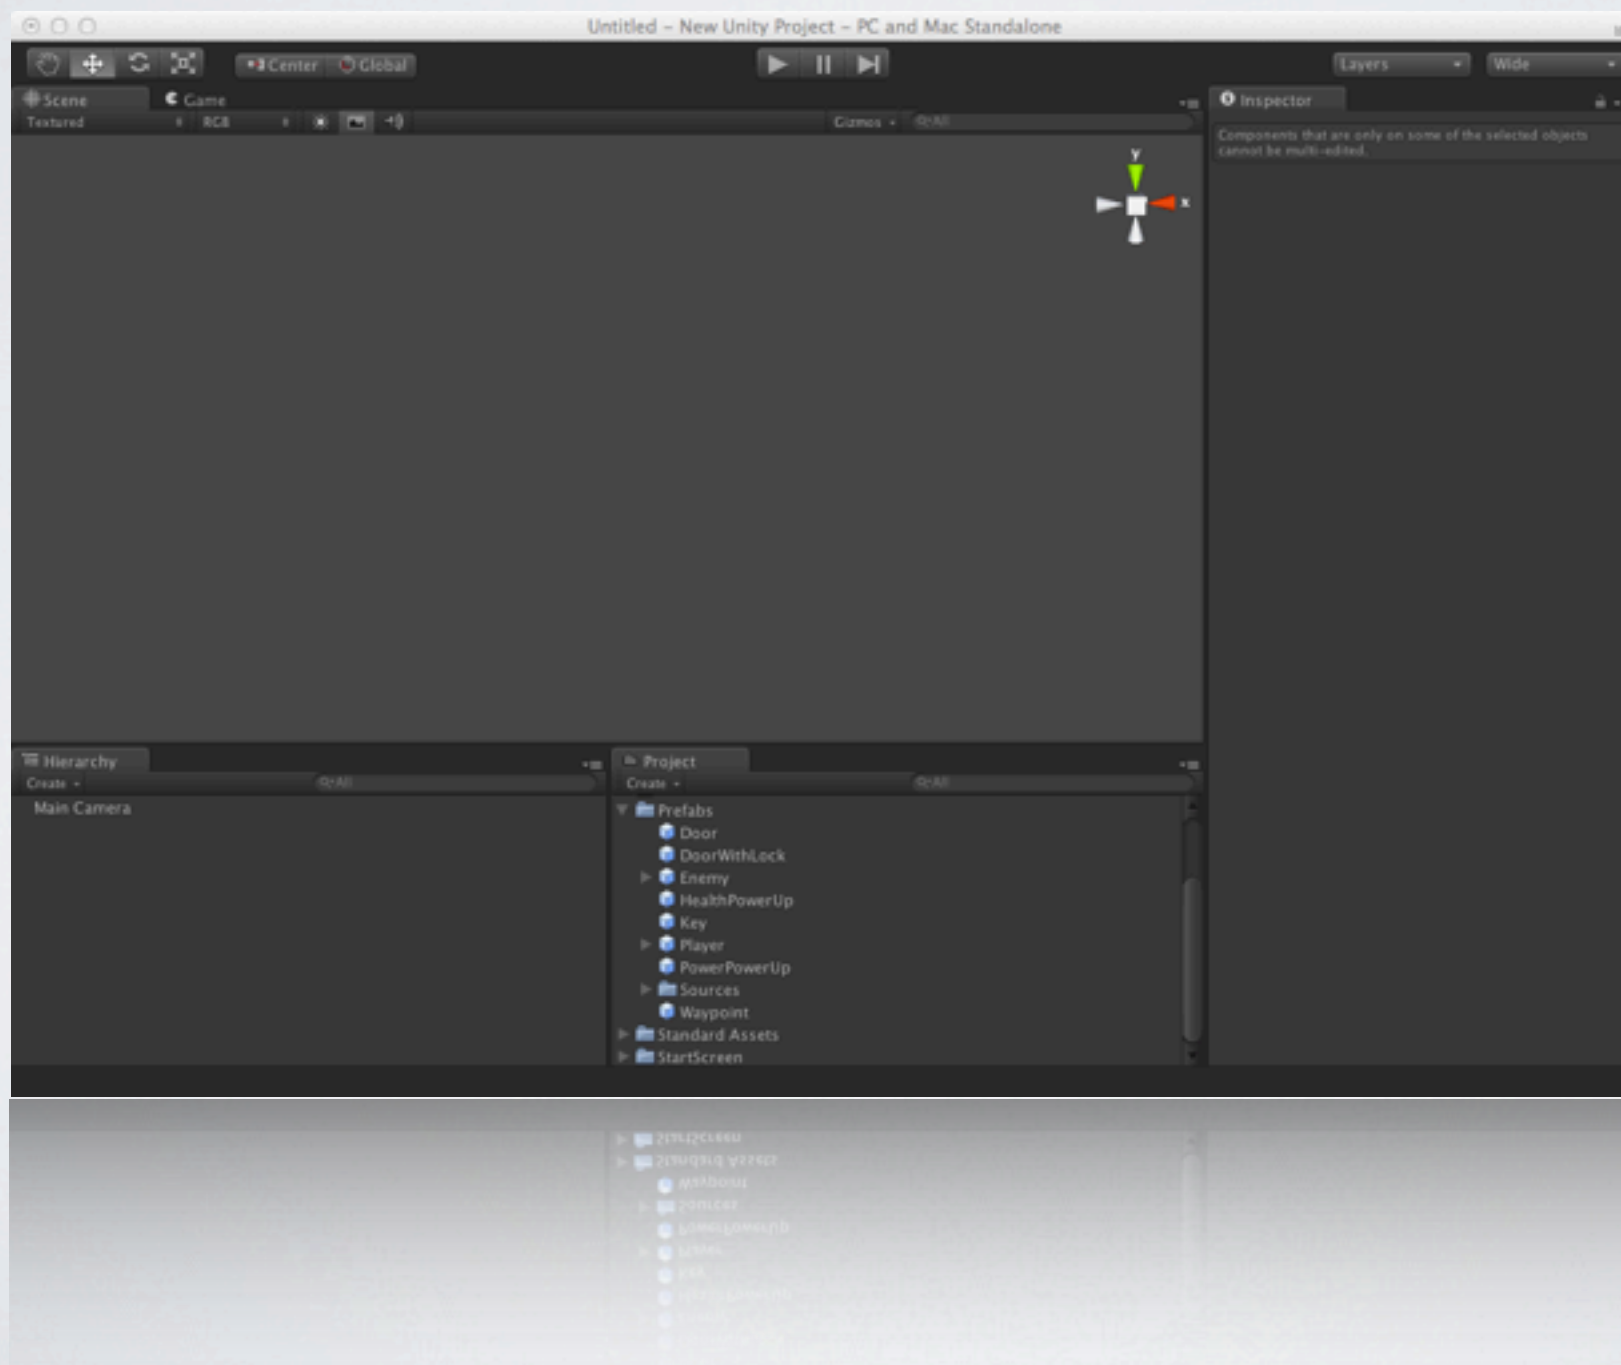

PLAY / PAUSE

- Debugging & Profiling
 - Instant launch, recompilation in background
- No need to recompile
- Debugging & Profiling
 - Unity MonoDevelop, Visual Studio and Xcode

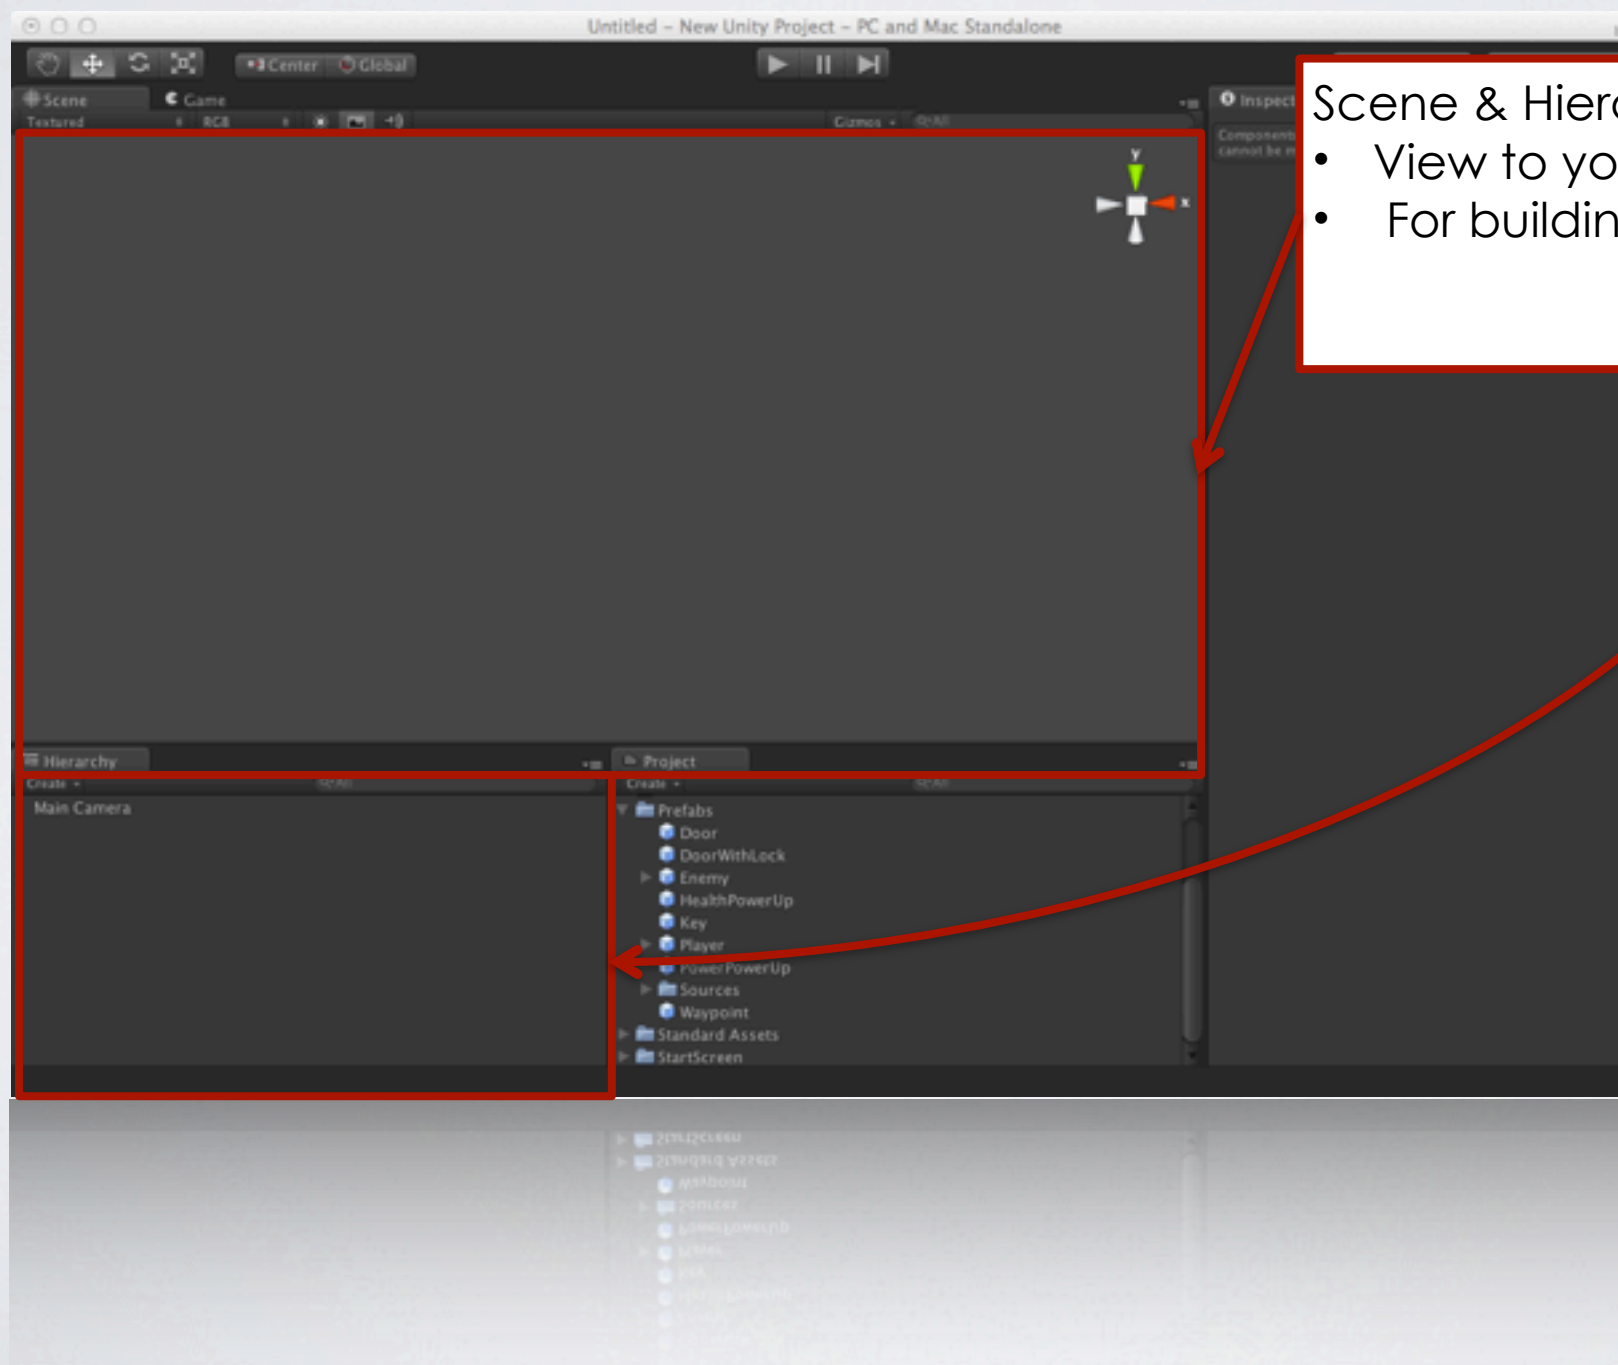

SCENE CREATION

ANATOMY OF UNITY GUI

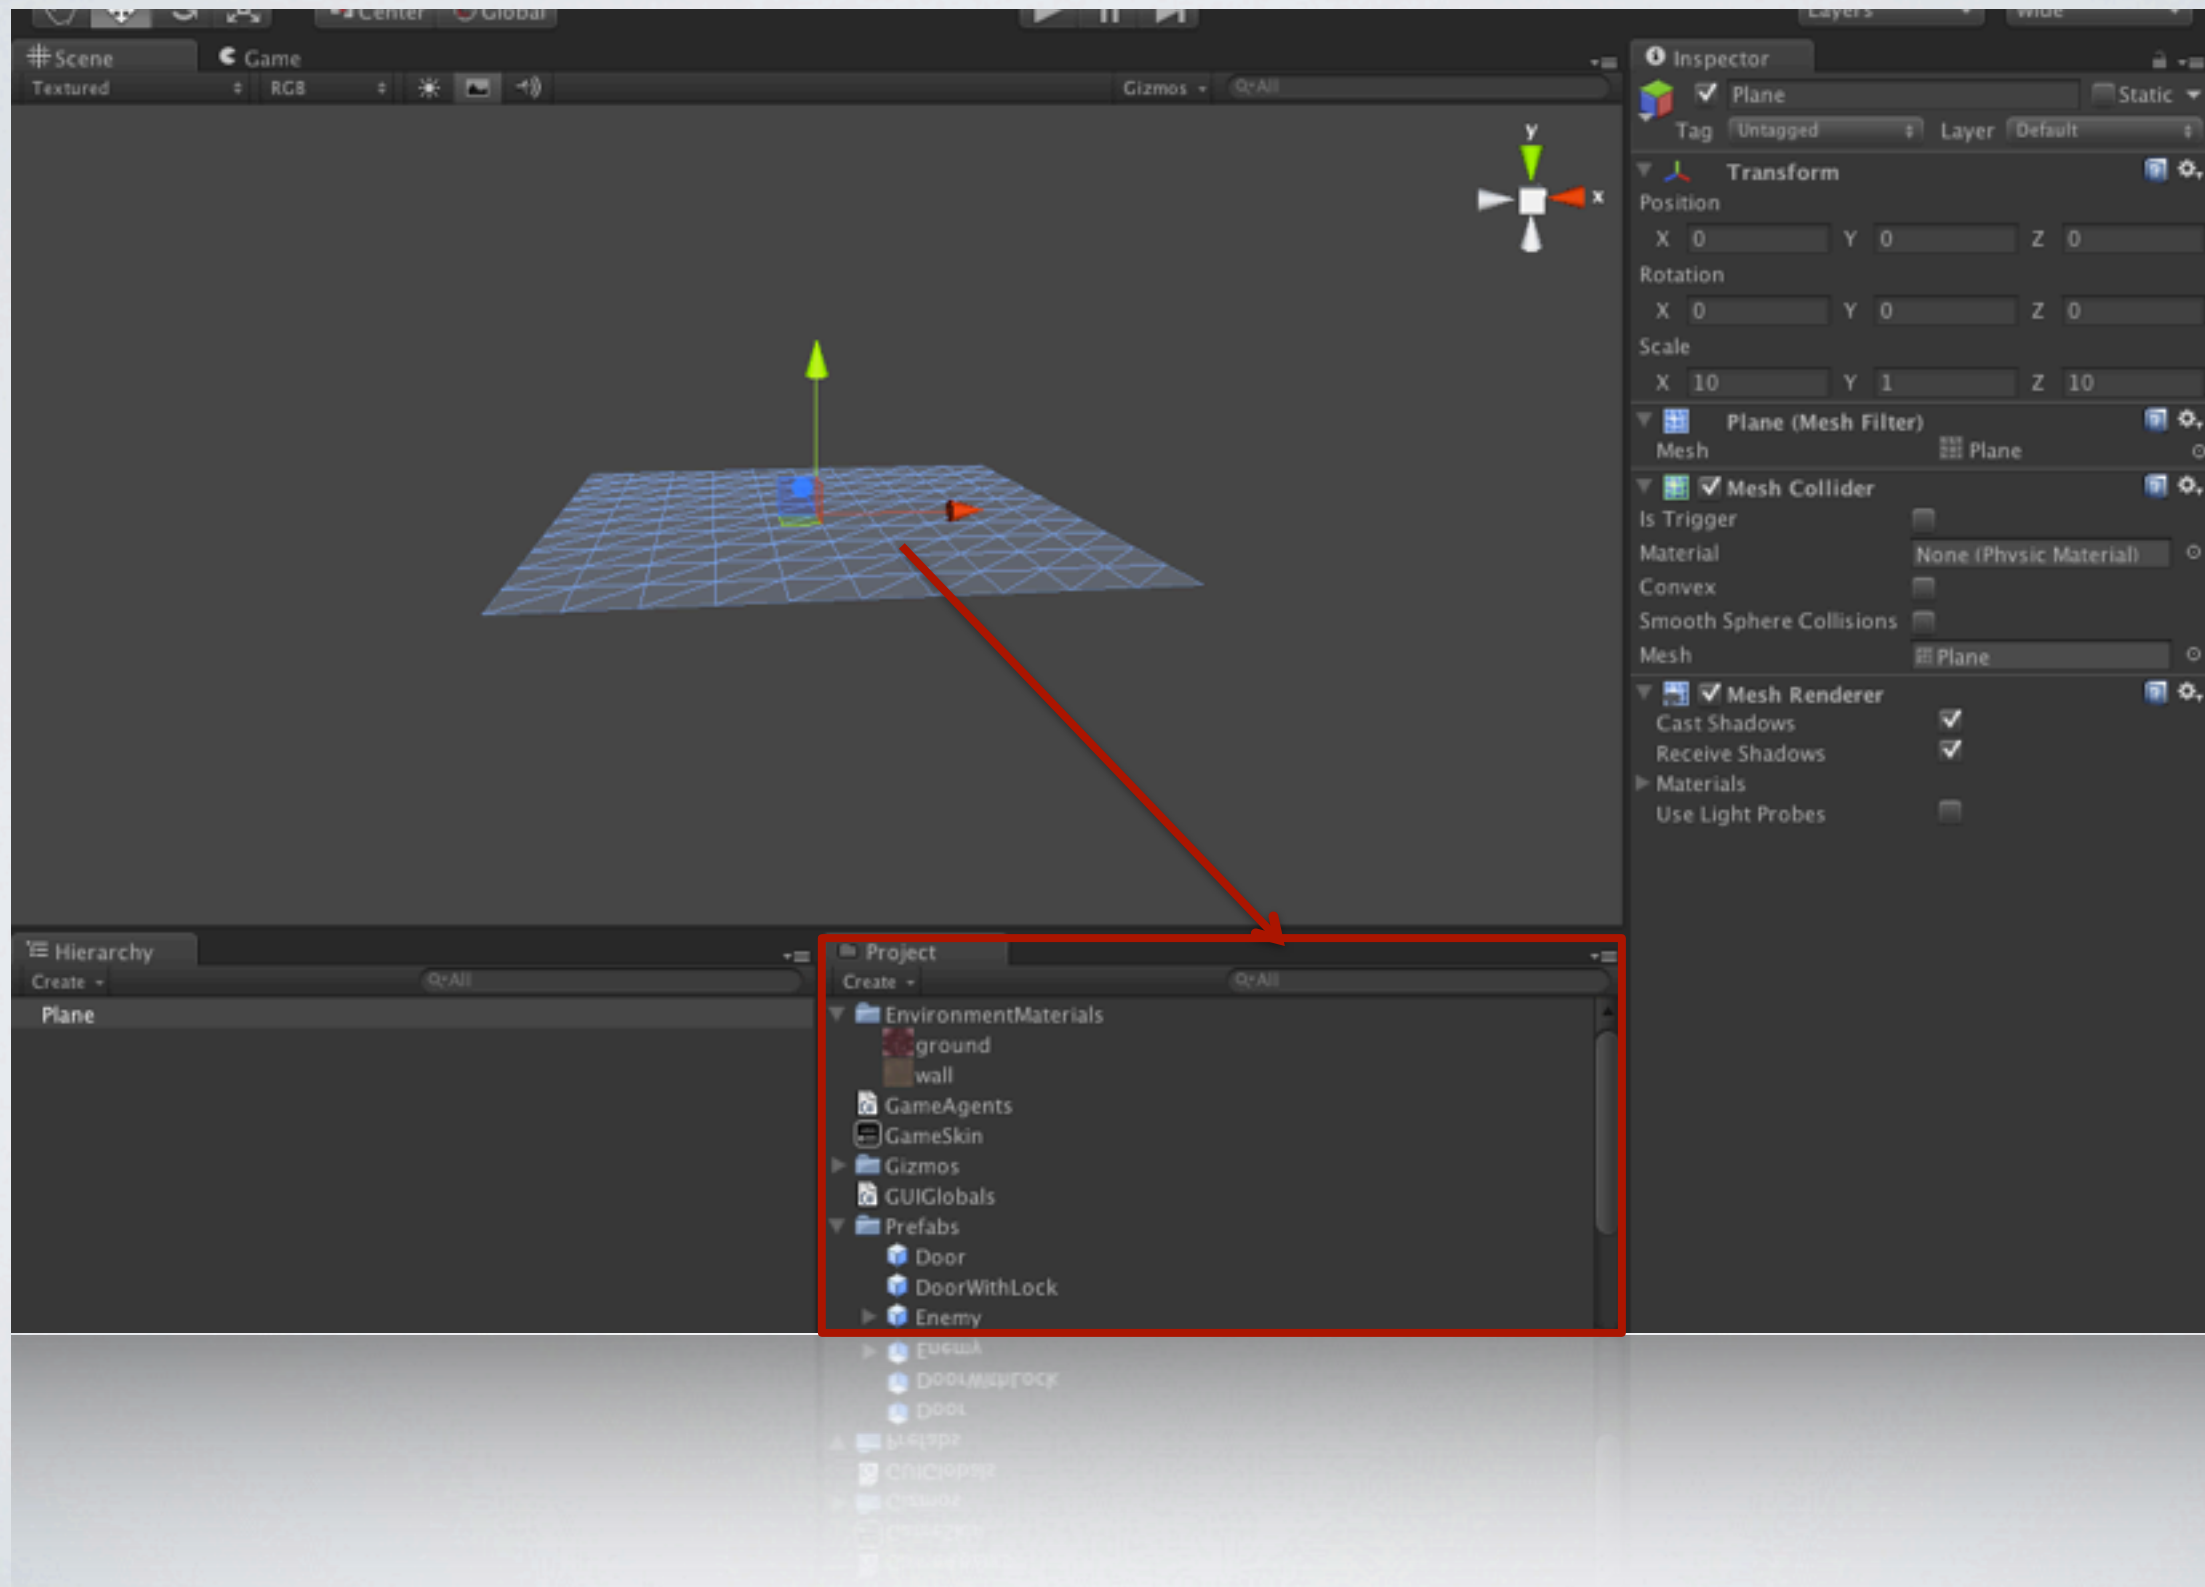

ANATOMY OF UNITY GUI

Scene & Hierarchy views

- View to your level (game)
- For building a level

ANATOMY OF UNITY GUI

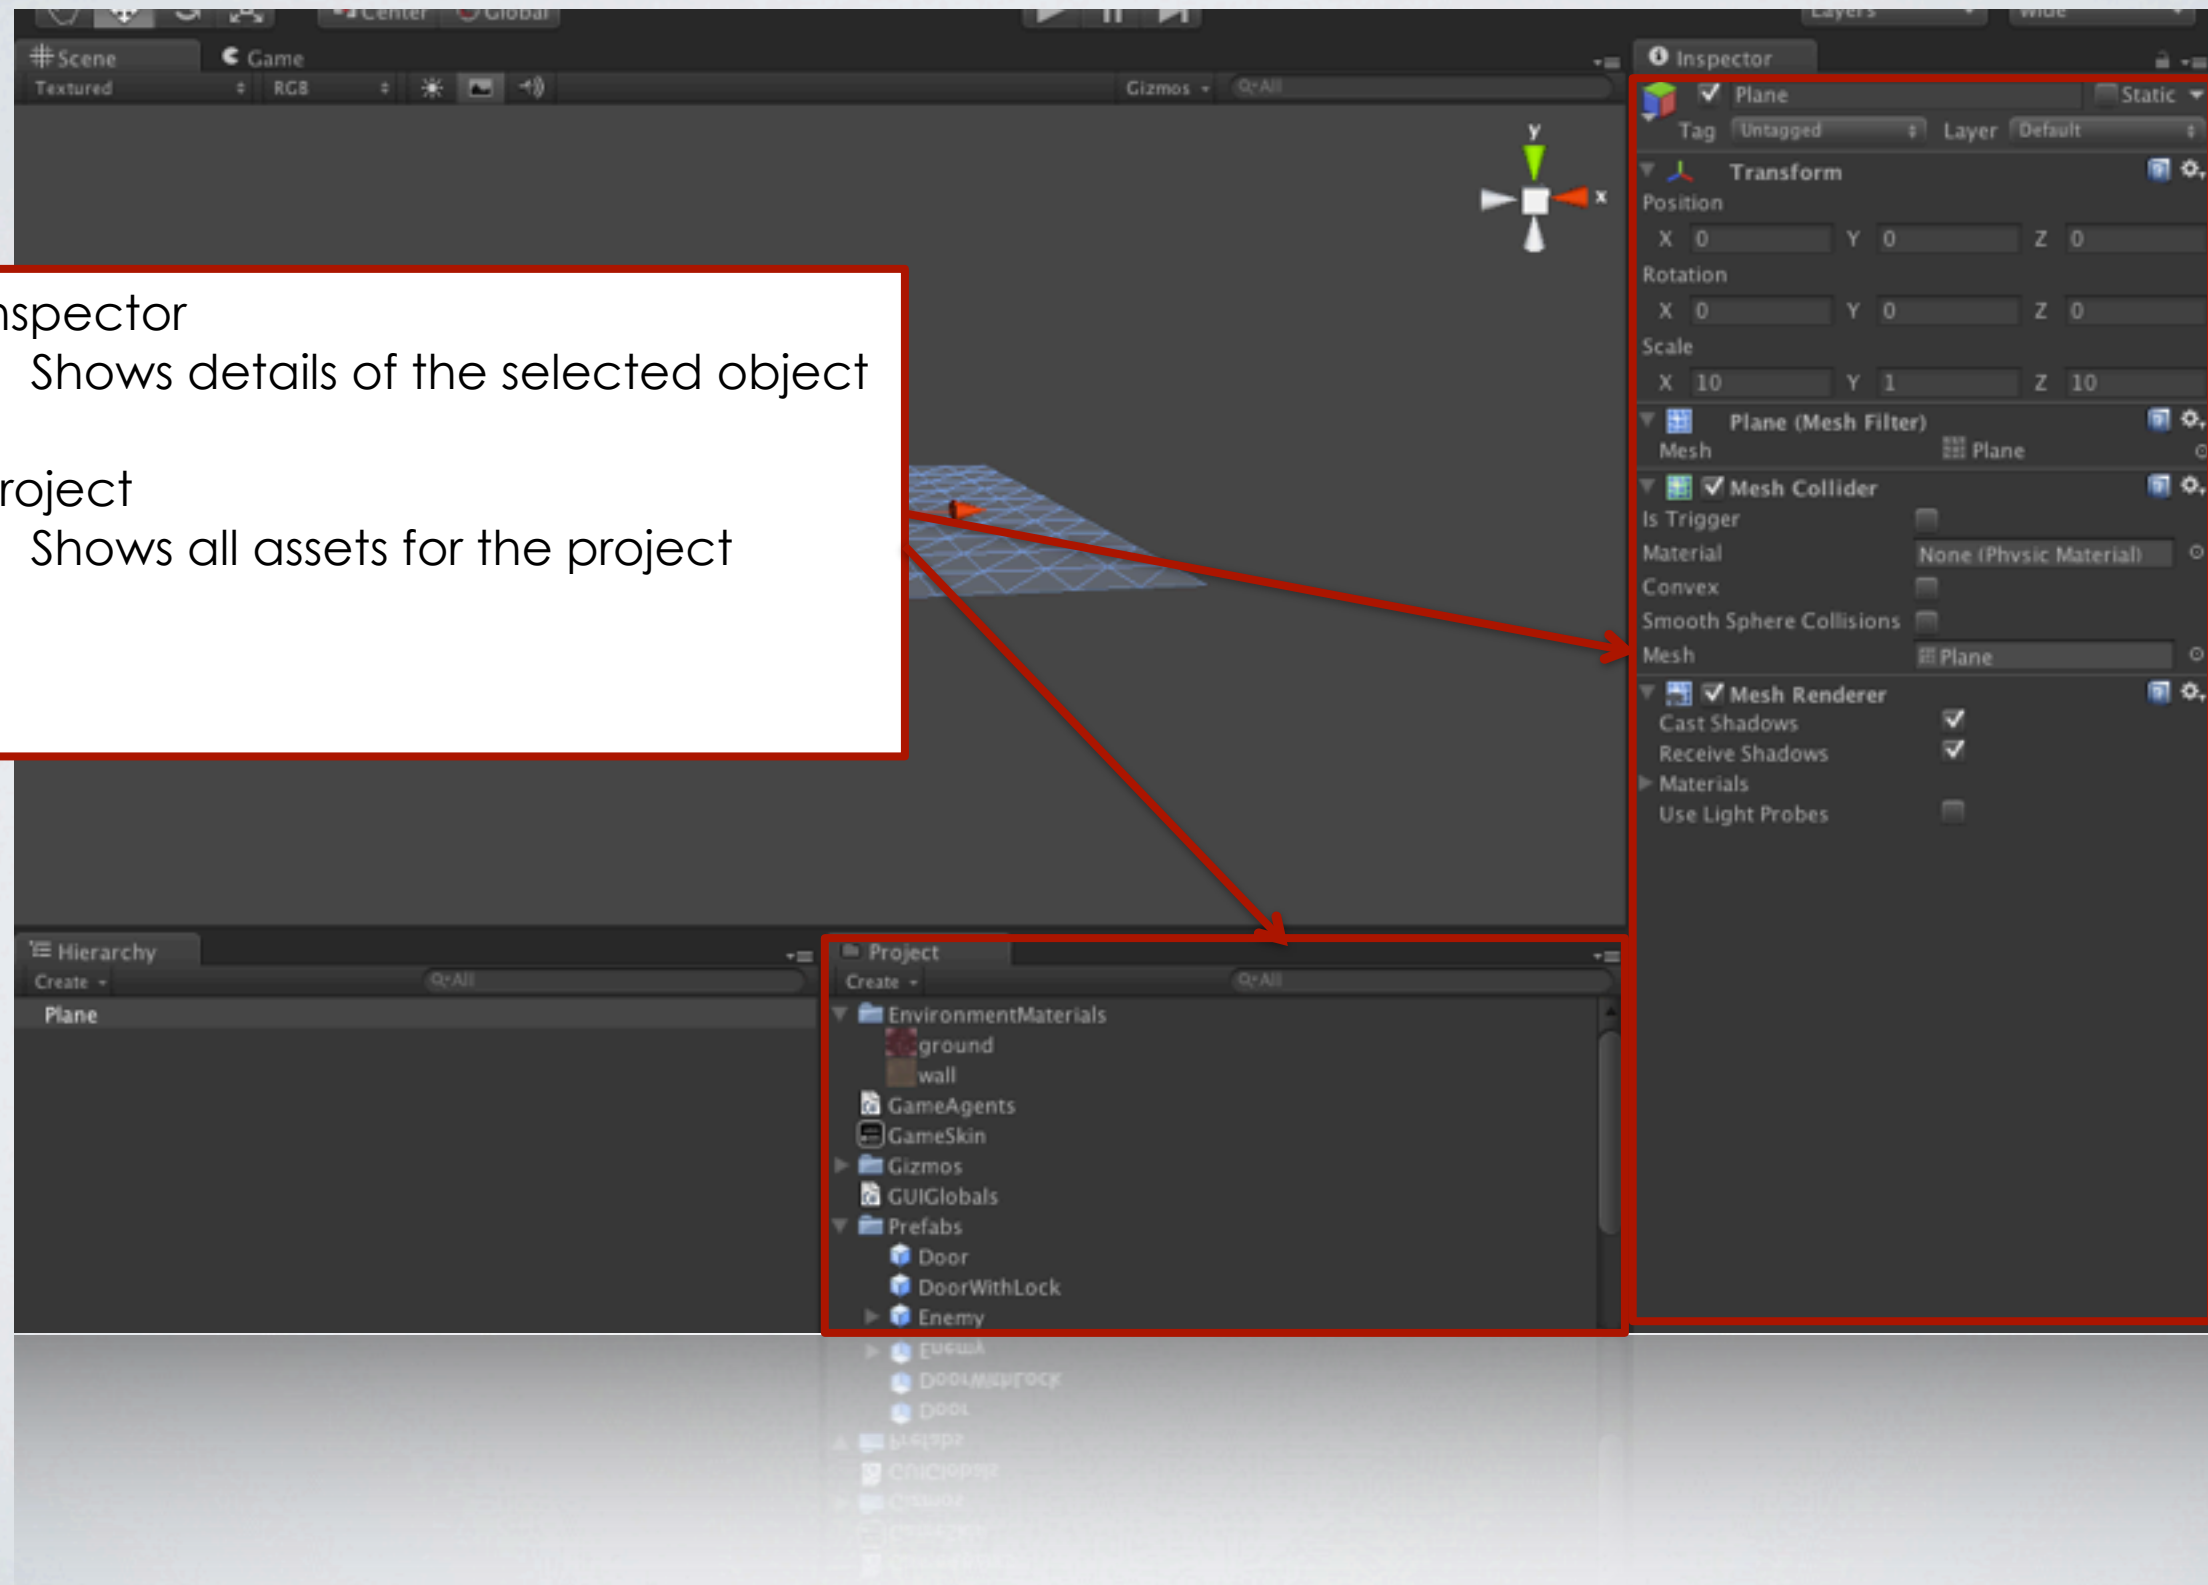

ANATOMY OF UNITY GUI

Inspector

- Shows details of the selected object

Project

- Shows all assets for the project

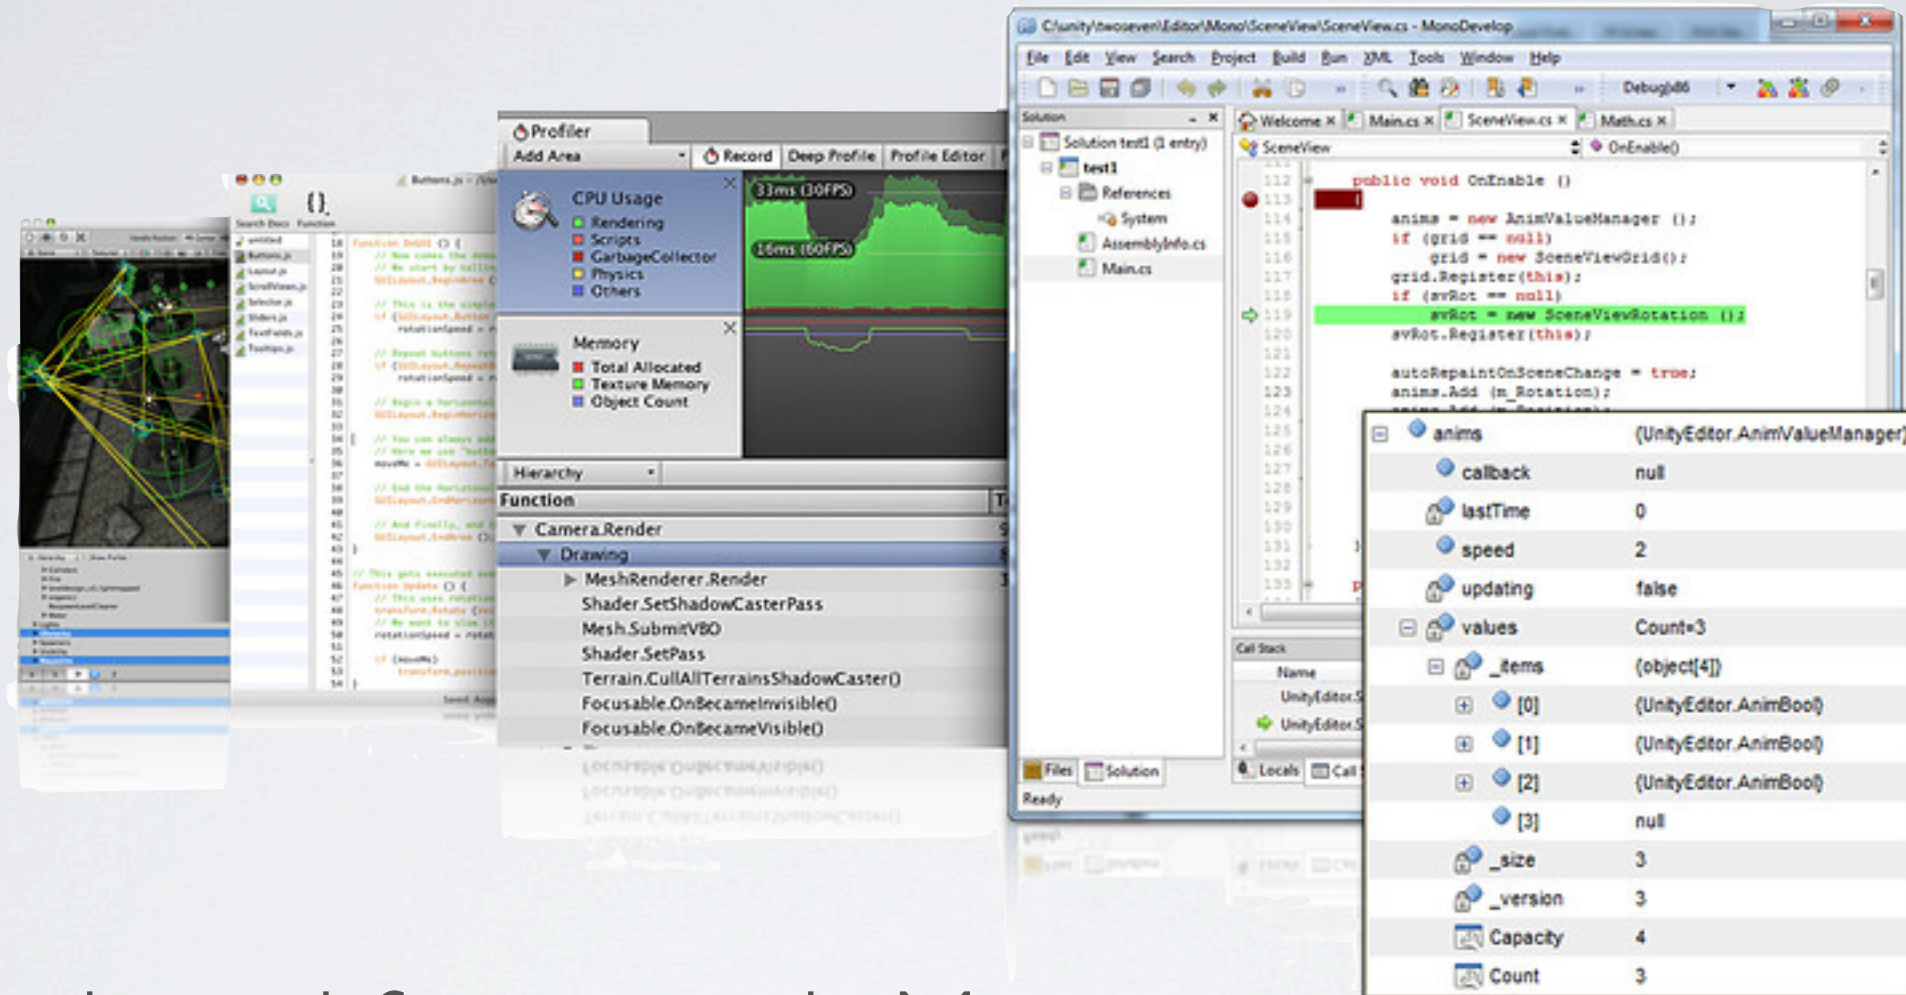

ASSET PIPELINE

- Automatic Asset Import
- Automatic file change detection
- Instantaneous Import
- Use Application for importing
- Great when working with art

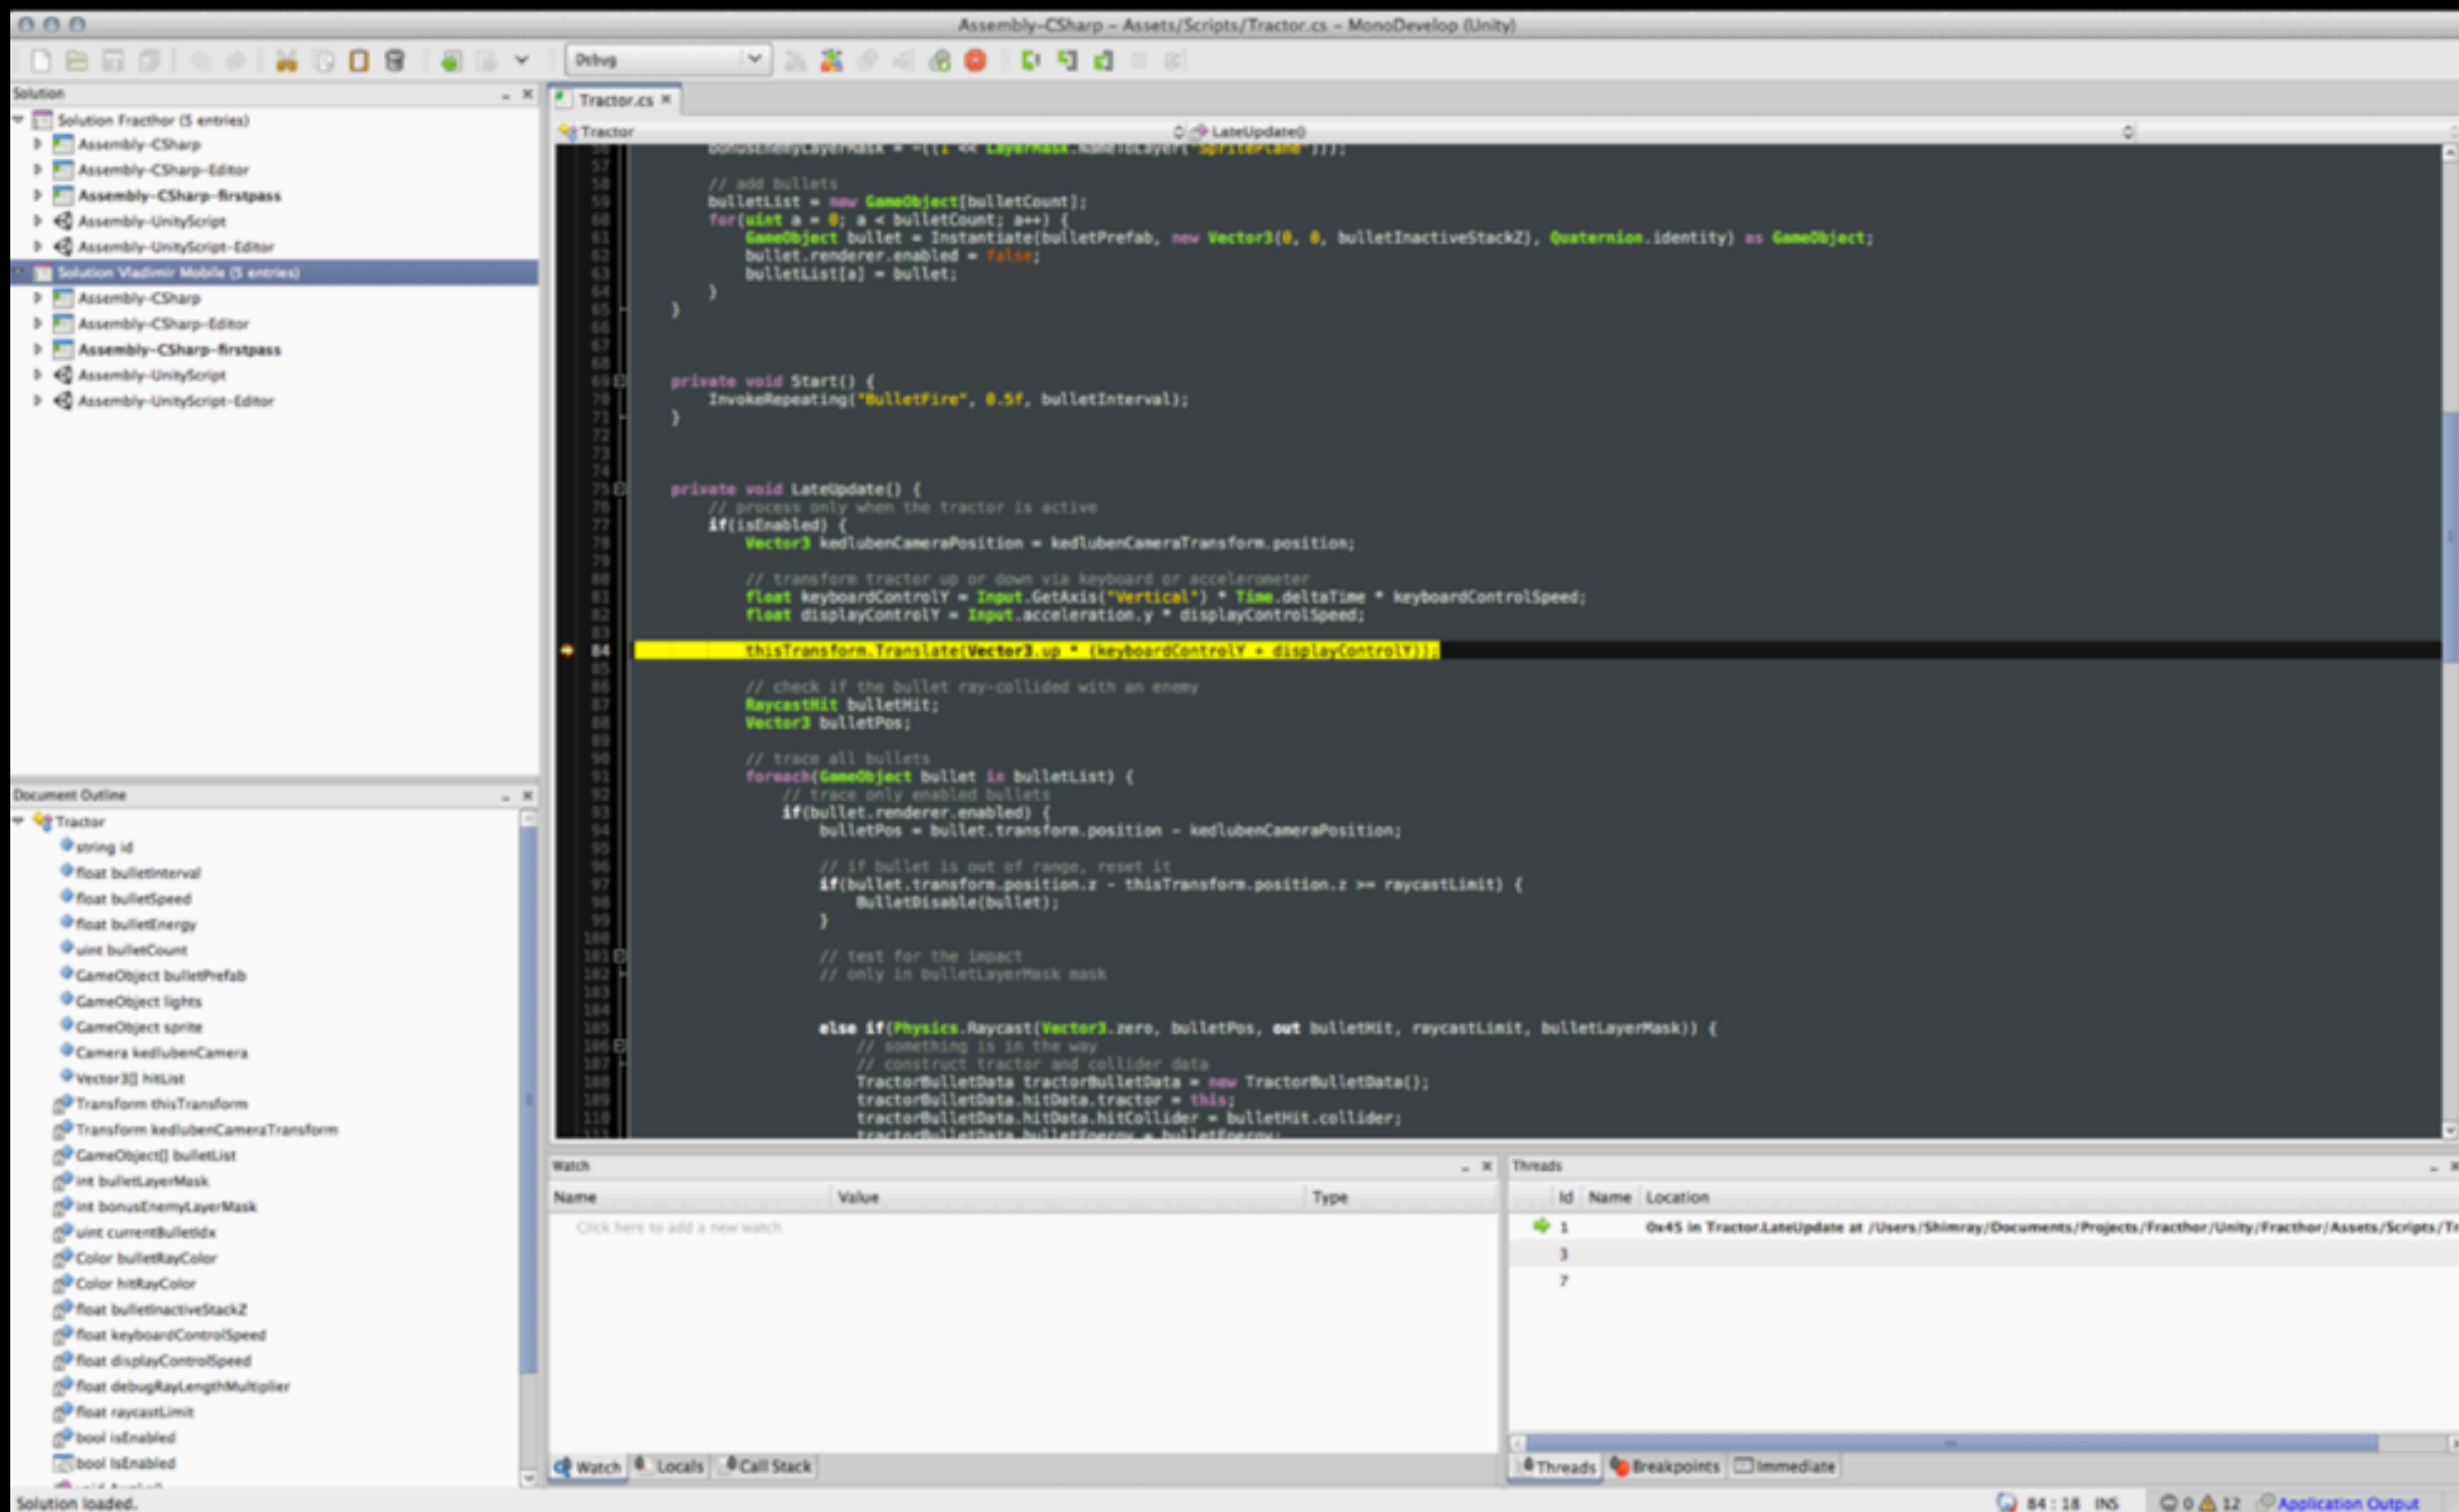

PROGRAMMING

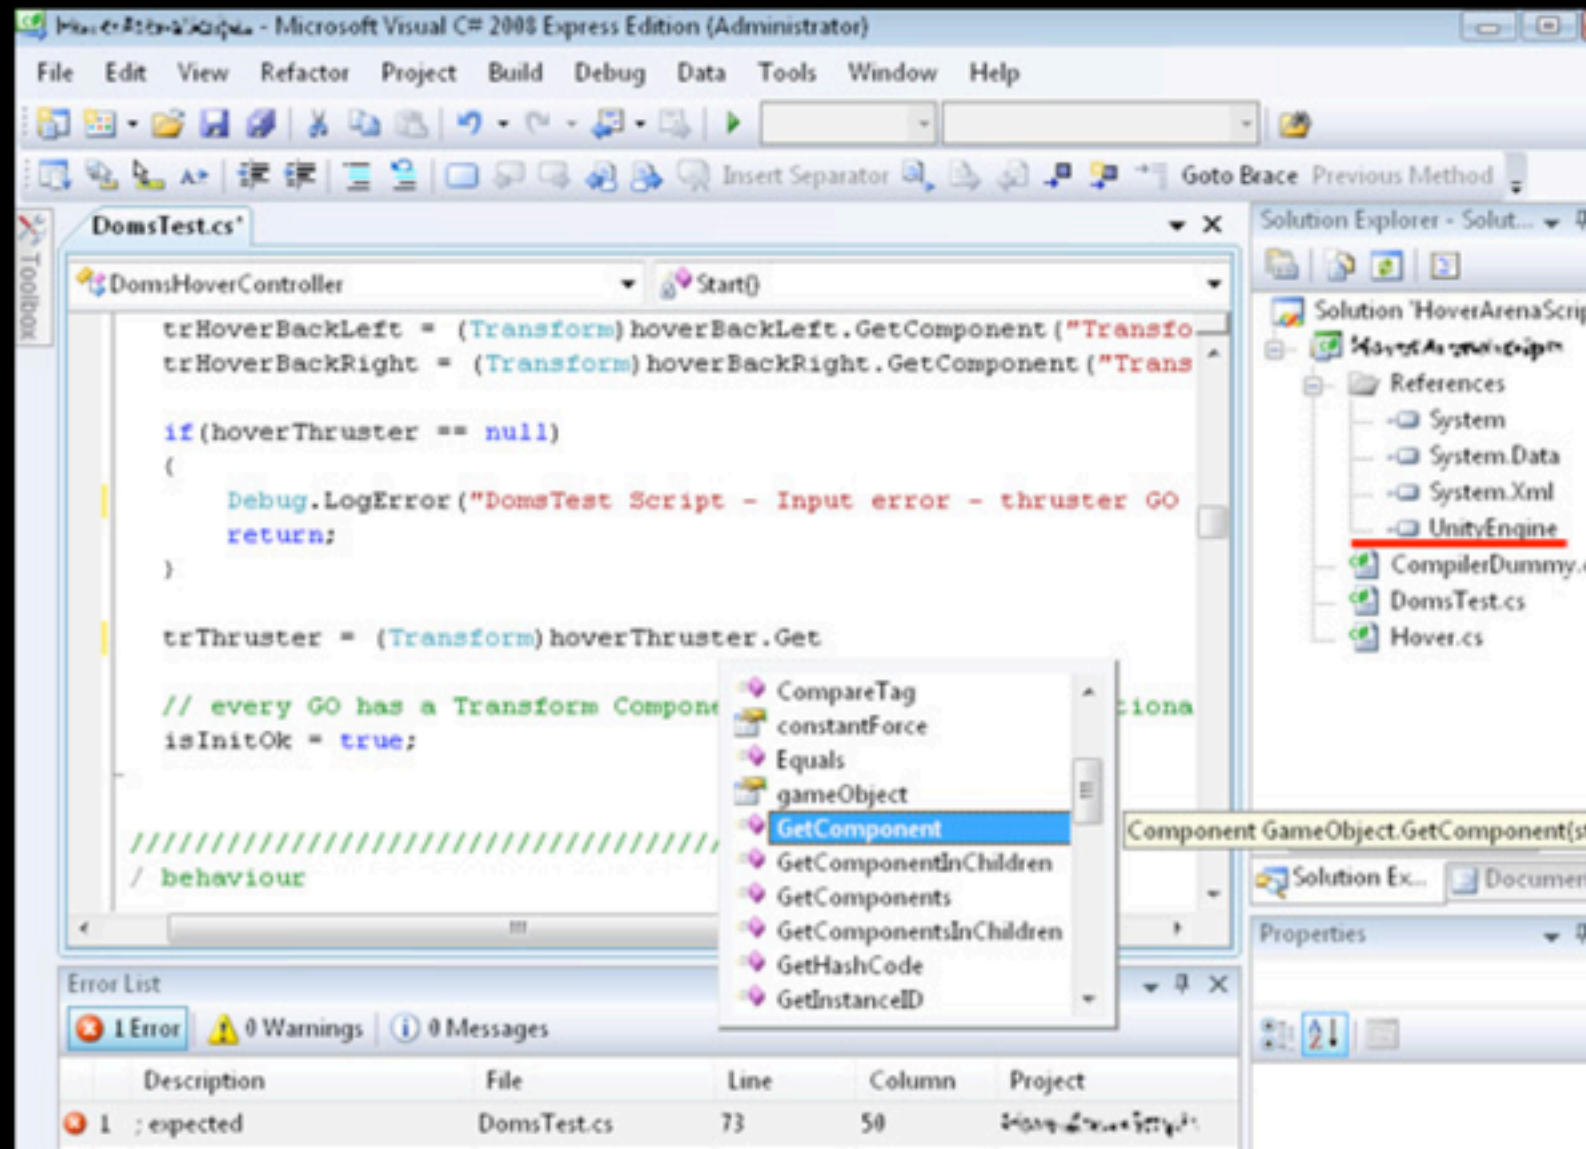

- .Net based framework; Mono
- MonoDevelop as main IDE
- Profiling your game

EDITORS

- MonoDevelop
- Microsoft Visual Studio
- TextMate
- any many others

MonoDevelop (OS X / Windows)

Microsoft Visual C# (Windows)

COMPONENTS & OOP

- Languages
 - C#, JavaScript, Boo
- Scripts as components
- Prefabs
- Rich API

JavaScript

```
// To access public variables and functions
// in another script attached to the same game object.
var script : ScriptName;
script = GetComponent("ScriptName");
script.DoSomething ();
```

C#

```
using UnityEngine;
using System.Collections;

public class example : MonoBehaviour {
    public ScriptName script;
    void Awake() {
        script = GetComponent("ScriptName") as ScriptName;
        script.DoSomething();
    }
}
```

Boo

```
import UnityEngine
import System.Collections

class example(Monobehaviour):

    public script as ScriptName

    def Awake():
        script = (GetComponent('ScriptName') as ScriptName)
        script.DoSomething()
```

Ball > ShootBall ()

```
1 using UnityEngine;
2 using System.Collections;
3
4 public class Ball : MonoBehaviour {
5
6     private Player player;
7
8     public GameObject chargeUp, ballLaunch, ballCollision, ballCollision2, otherCollision, otherCollision2, gatePickup, gateDrop, powerUpPic
9     public int soundDif = 20;
10    public KeyCode key;
11
12    void Start()
13    {
14        player = gameObject.GetComponent<Player>();
15    }
16
17    void Update ()
18    {
19        if(Input.GetKeyDown(key))
20        {
21            if(!dirLocked)
22                LockDirection();
23            else
24                ShootBall ();
25        }
26        //Debug.Log ("Velocity: " +rigidbody.velocity.magnitude );
27        if(rigidbody.velocity.magnitude > maxVelocity)
28        {
29            rigidbody.velocity = rigidbody.velocity.normalized*maxVelocity;
30        }
31    }
32
33    void ShootBall()
34    {
35        Vector3 dir = - new Vector3(ballHeading.forward.x, 0, ballHeading.forward.z);|
36        if(useChargedShot)
37        {
38            rigidbody.AddForce( dir * baseShootForce*chargedForce);
39            UnlockDirection();
40        }
41        else
42        {
43            rigidbody.AddForce(dir * baseShootForce);
44            UnlockDirection();
45        }
46        ballLaunch.audio.Play();
47    }
48 }
49
```

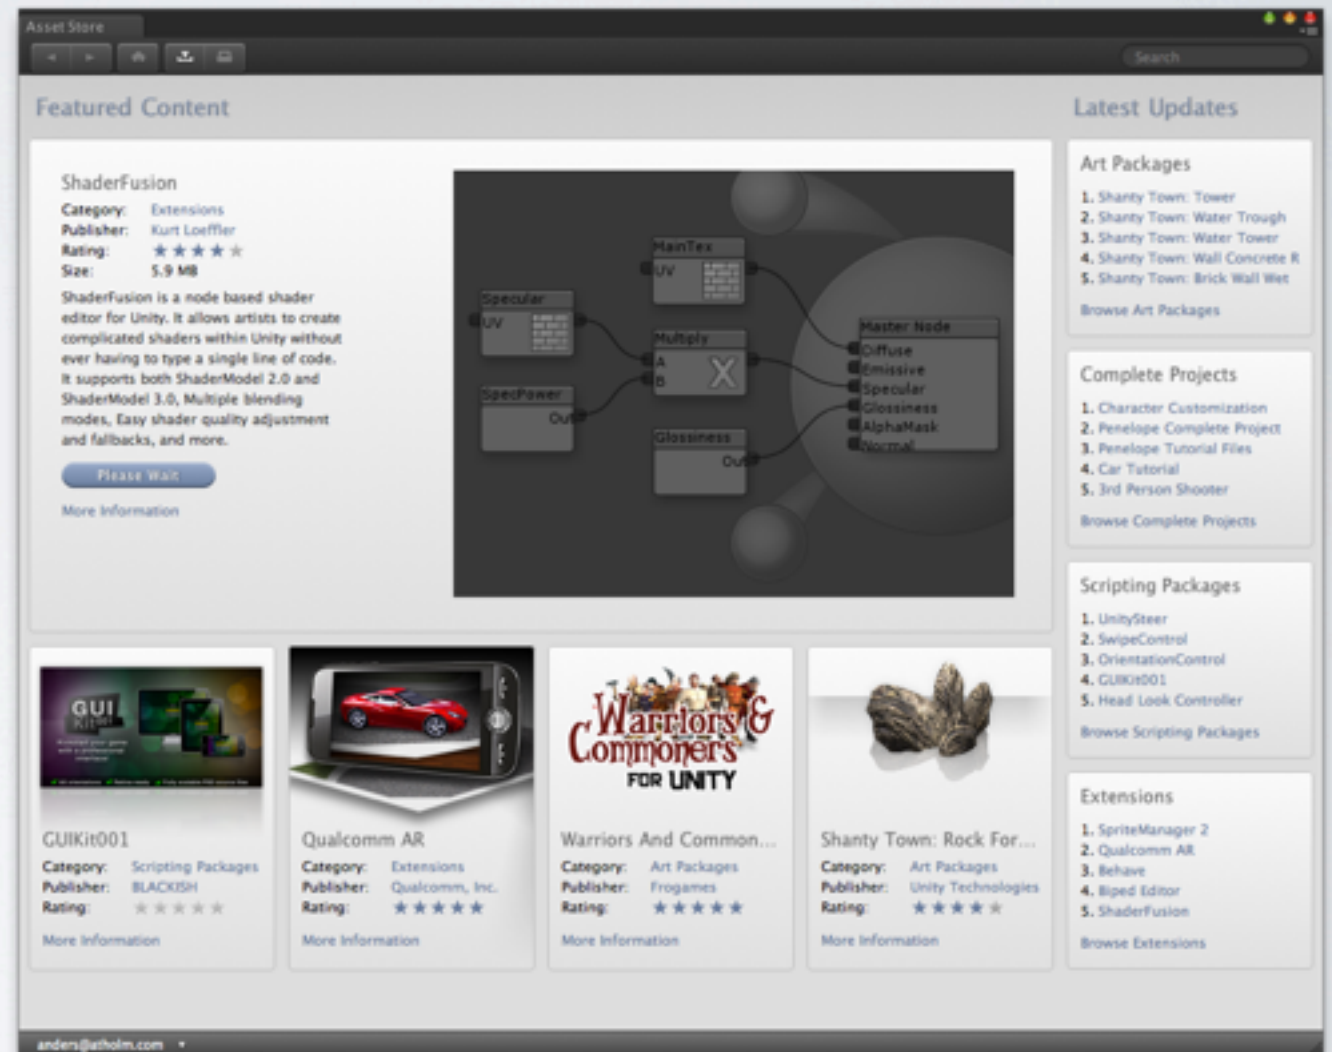

PROFILING DEBUGGING

- Deep profiling
- Attach to process

ASSET STORE

- Sell and buy assets
- Lots of extensions
 - Save time

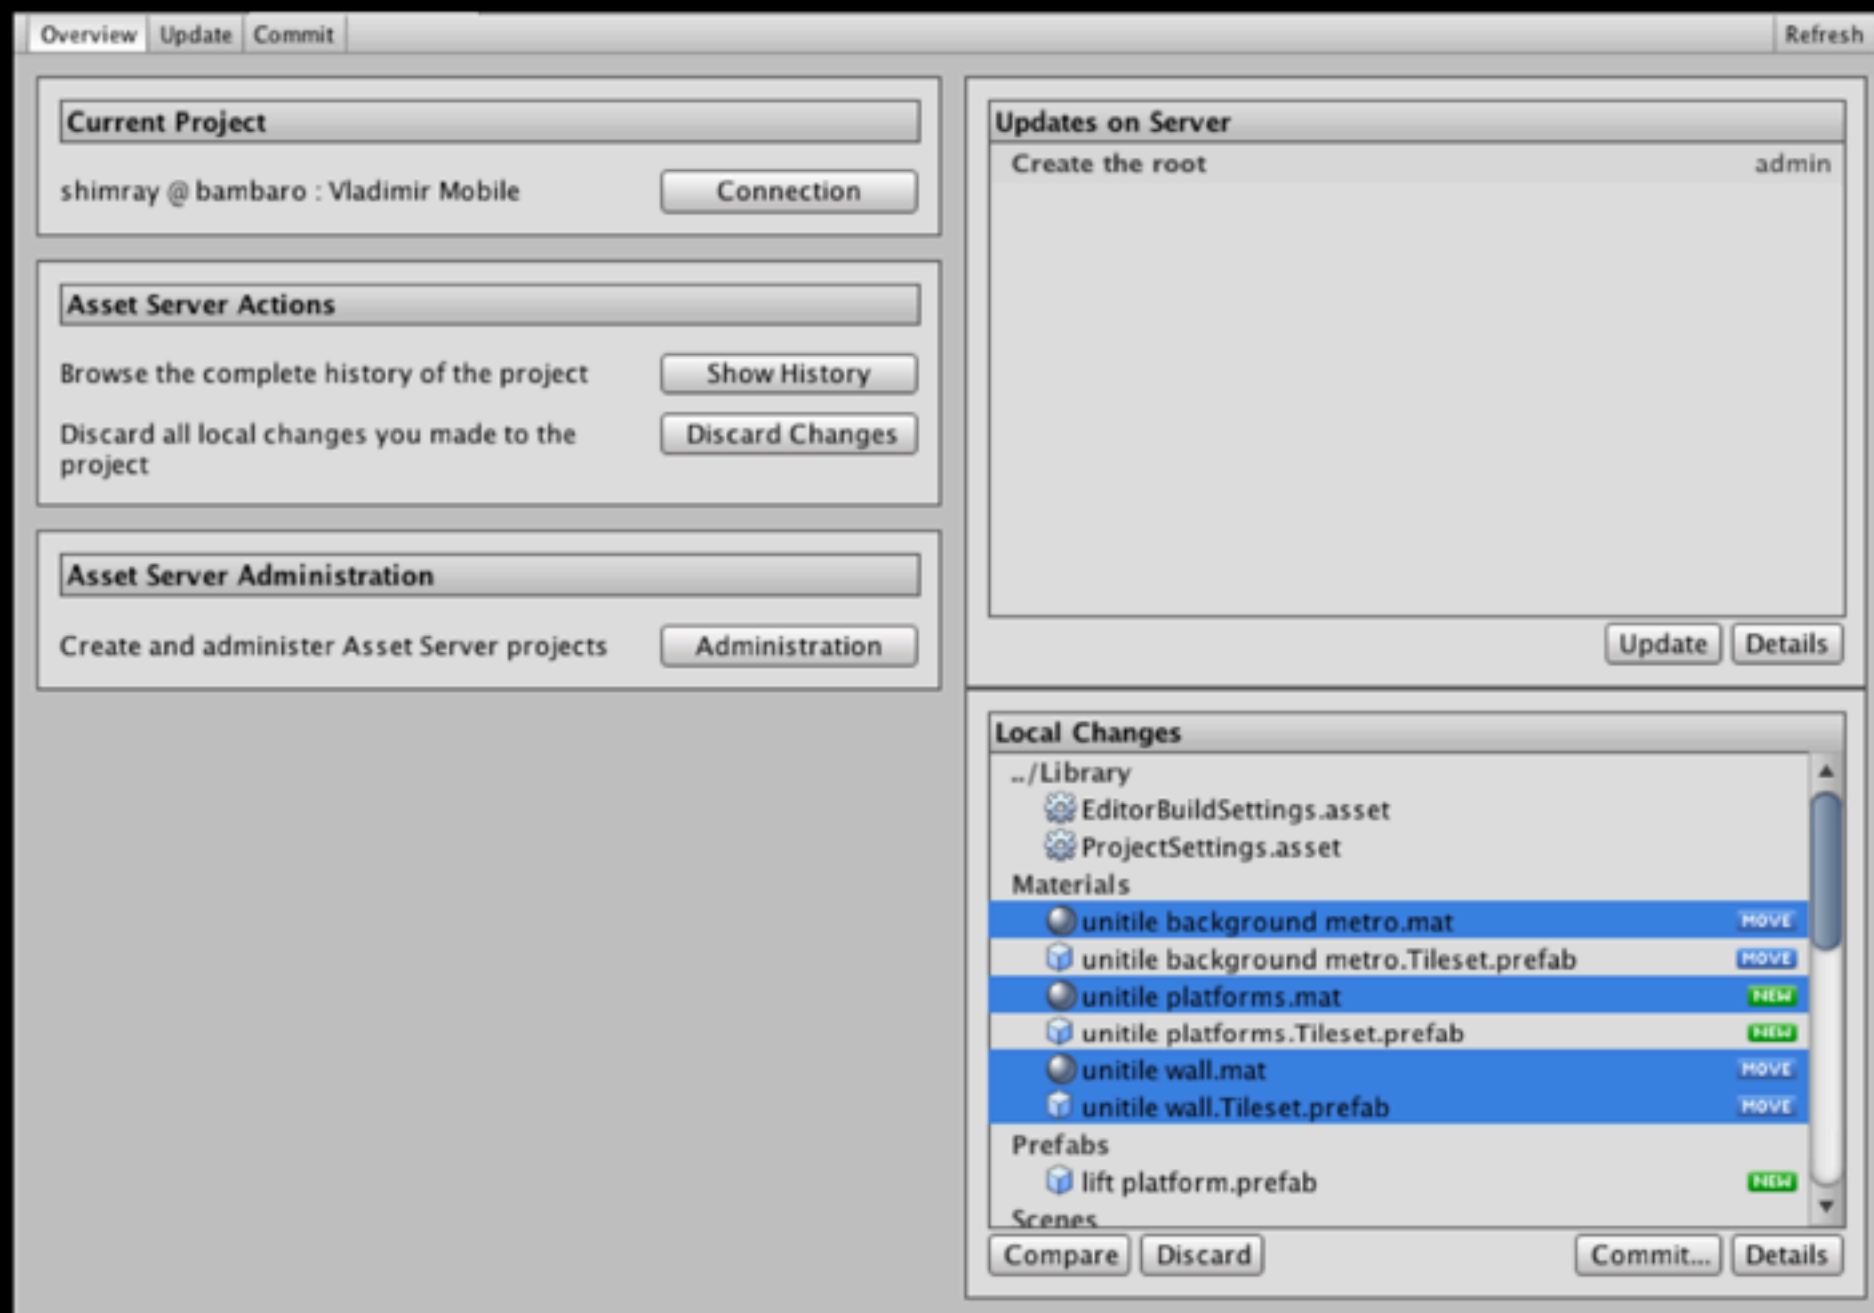

ASSET STORE

- Buy 3rd party assets
- 3D Models
 - Characters, environments, vehicles, vegetation...
- Textures
- Shaders, bricks, fabric, metal, nature, paper, road..
- Audio
 - Music, sound FX, ambient sounds...
- Example projects
- Tutorials, templates, demos, games..

ASSET SERVER

- Large teams, versioning
- Integrated
- Needs a free server, but a separate client license
- Supports other systems
 - SVN
 - Perforce
 - git

Asset server

WHICH PLATFORMS?

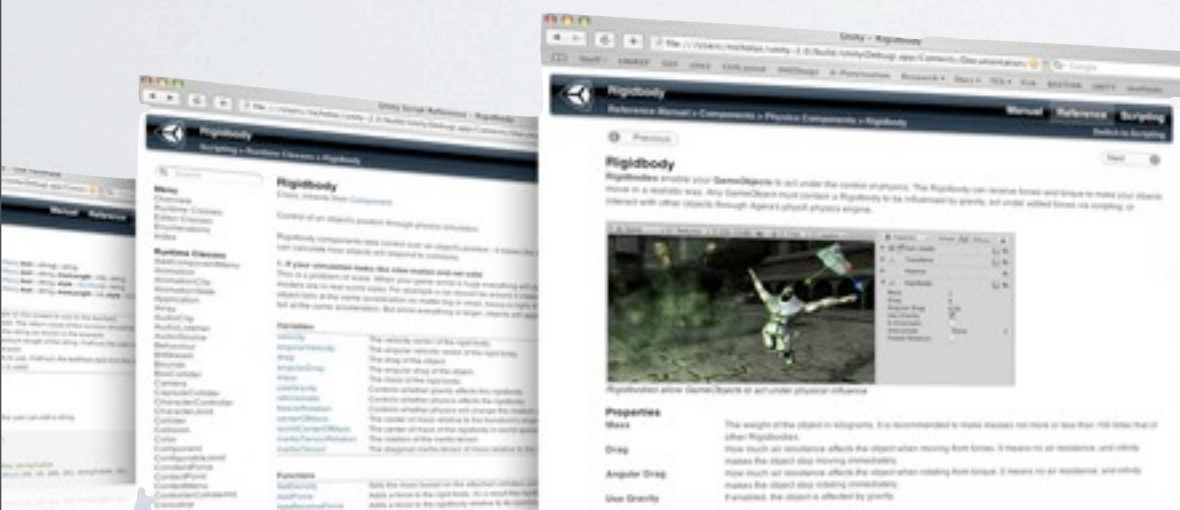

UNITY REMOTE

- Realtime preview
- Mobile device features transferred to Unity
- Multitouch
- Accelerometer / gyroscope
- Lower FPS and visual quality

DOCS & COMMUNITY

- Good Documentation, Build in Editor and IDE
- A lot of resources; Tutorials, Sample Projects and Presentations
- Big Community; Forum and IRC
- UNITE

UNITY 4.3

- New GUI System
- 2D Support
- Unity Cloud
